

## PG BISON CLADDING SOLUTIONS

IF WALLS COULD TALK...

# SET THE SCENE WITH PG BISON WALL CLADDING SOLUTIONS.

Travellers at OR Tambo International rush through a crowded corridor clad with PG Bison's Formica SolidCore. Customers browse for goods in a stylish Boardmans shop clad with MelaWood. Residents ride lifts clad with Formica HPL to their converted lofts in Cape Town's Old Mutual Building. Employees congregate

in a boardroom, the walls covered with BisonPly. Train passengers travel in coaches clad with Formica SolidCore.

Cladding. It may not be the focus of your design, but its presence is vital. And it can't be just any material. It must be versatile, durable and of course, fashionable. After all, cladding provides the backdrop; it sets the stage. And colourful or neutral, high or medium performance grade, the cladding is part of the story; it creates the scene.

Take the scene at Boardmans, for example. When the popular home goods store needed a fresh look, designers employed MelaWood, with its endless colour options and scratch resistant surface, to establish a sleek setting for shoppers. Nando's and Pick 'n Pay also use PG Bison materials to clad their interiors, setting the scene for customers to eat and shop in a relaxed environment.

The scene at OR Tambo International is a little different. Twenty years ago, the airport came to PG Bison for a durable material to clad the interiors of the airside corridors and air bridges. With thousands of people rushing through on a daily basis, the material would need to be

both aesthetically pleasing and extremely strong, with an impressive fire rating too. It would have to withstand passengers crowding into corridors, bumping luggage on corners and leaning against walls. Certainly only one material could hold up in such extreme circumstances.

In 1989, contractors installed 16 200 m<sup>2</sup> of Formica SolidCore in seven different shades of the aptly named 'Sky Blue' colour series. Today, despite the twenty million people that pass through the airport annually, not a single panel has required replacing.

As a designer, you know that cladding contributes to the overall effect of your design. You need something versatile enough to complement your design and durable enough to protect it. PG Bison offers a variety of options for every scenario. From lower traffic areas like boardrooms and domestic interiors to high traffic spots like lifts and shopping malls, PG Bison has the right material for every application imaginable.

## COMPLETE CLADDING FROM PG BISON. VERSATILE SOLUTIONS FOR EVERY IMAGINED APPLICATION.

From airports to shopping malls, boardrooms to bedrooms, PG Bison offers cladding solutions for every application. Versatile and efficient, the materials are available in a broad range of colours and finishes with various levels of resistance to mechanical, chemical and environmental damage.
